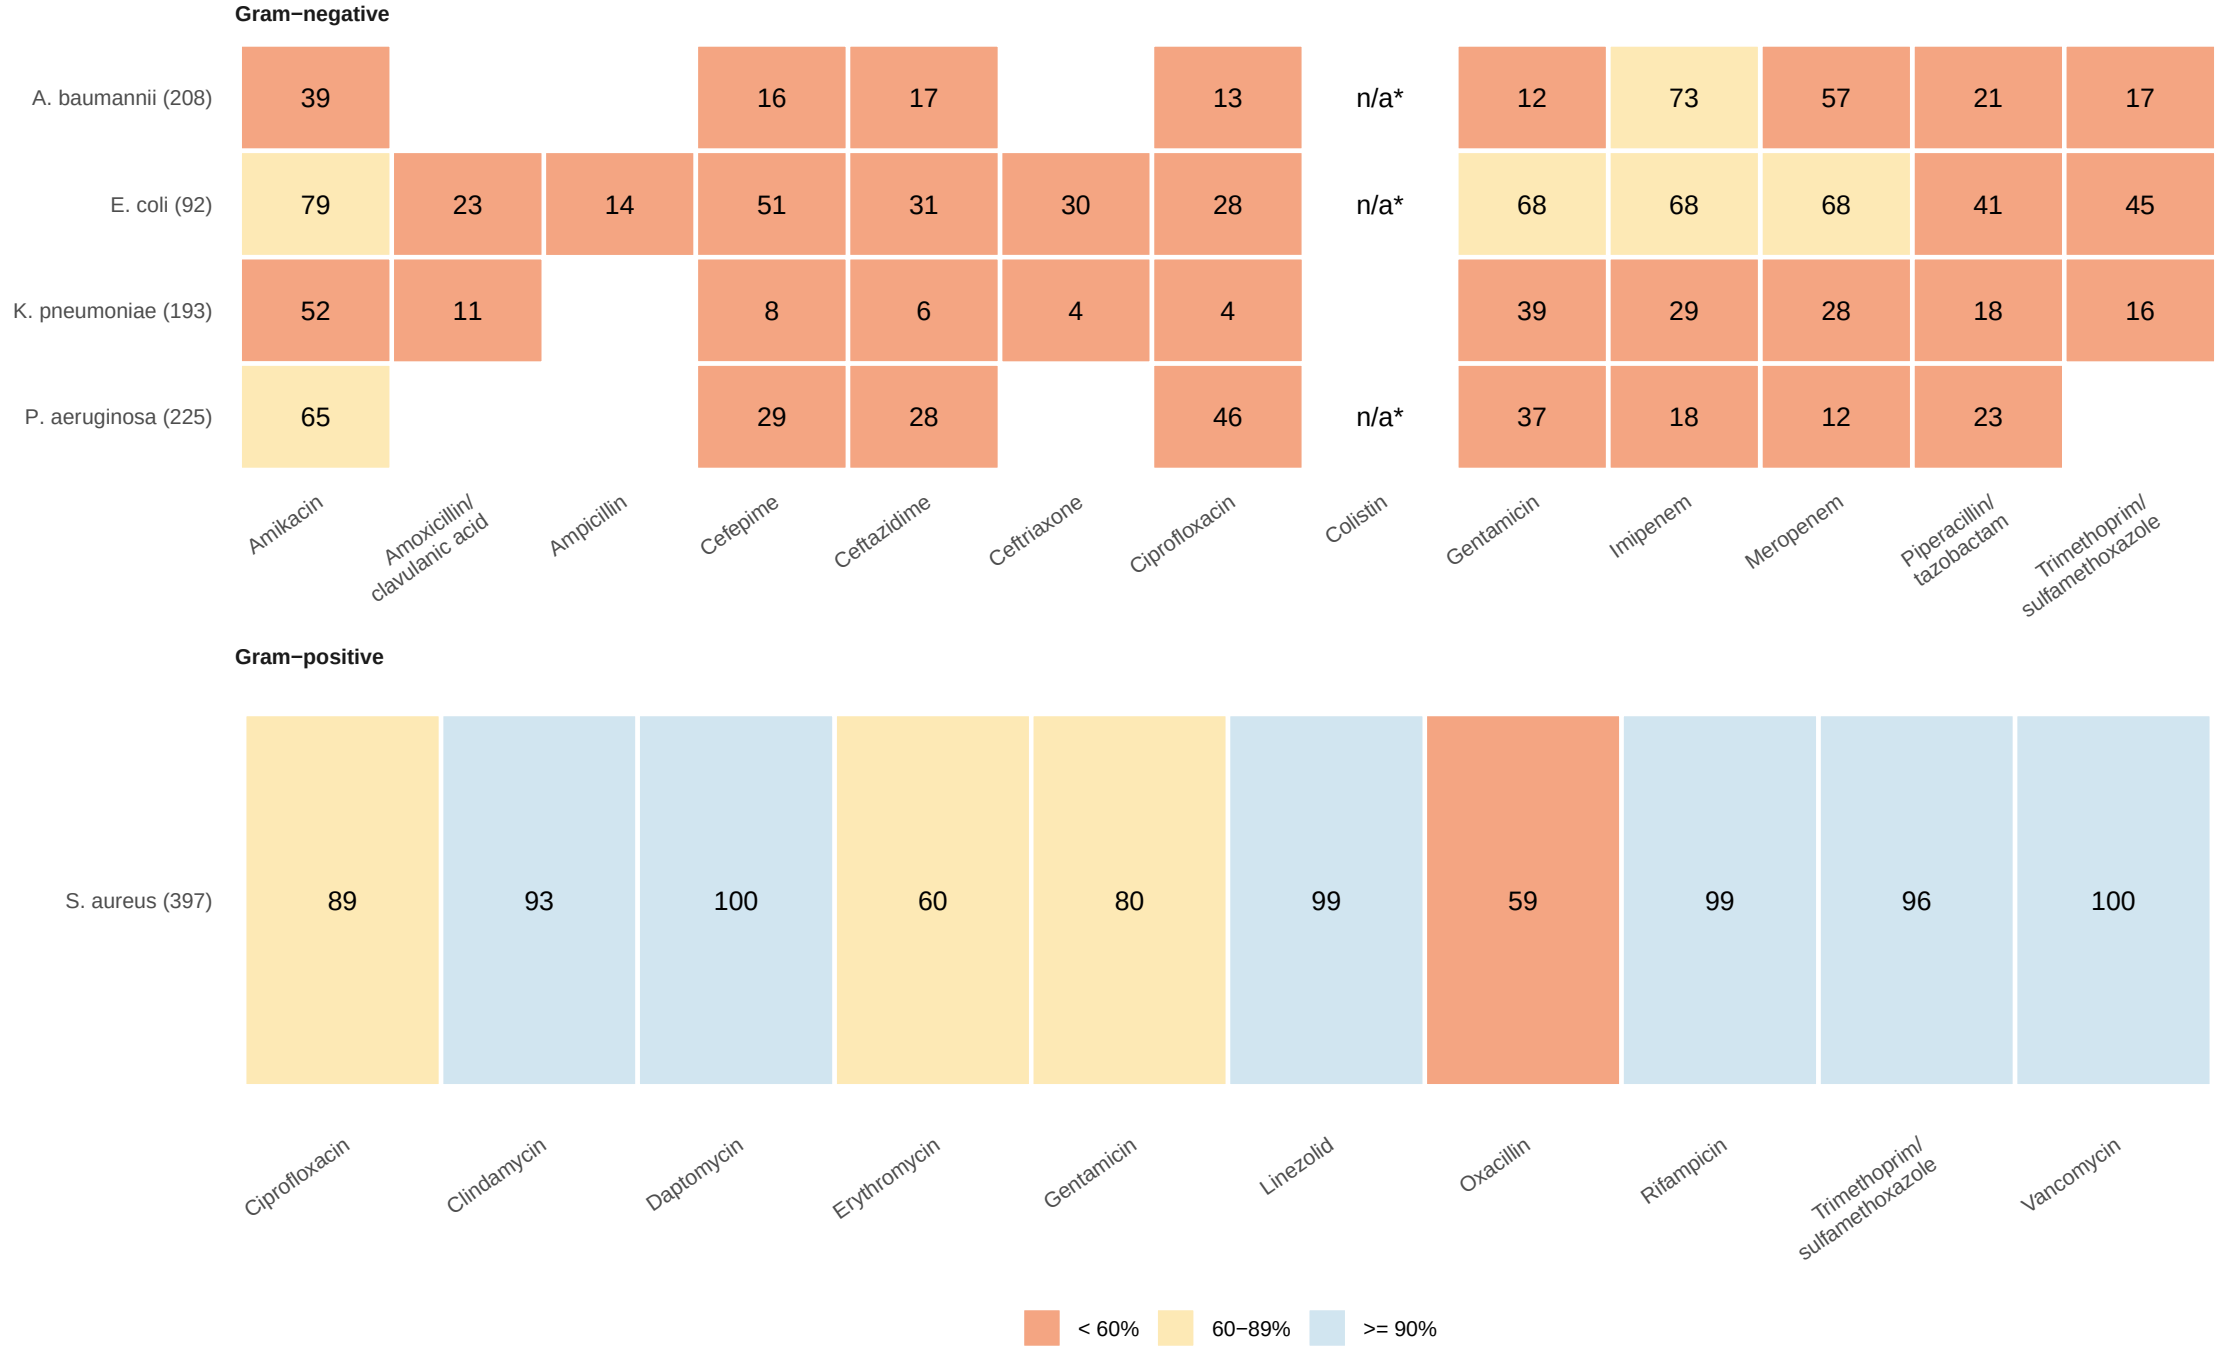
Cumulative antibiogram, 2003−2025

NCBI BioSample antibiograms (real isolates, not a surveillance sample)
% susceptible. Organism (number of first isolates).



First isolate per patient and species per 365 days (CLSI M39). Raw MIC and disk values: CLSI 2025 breakpoints; S/I/R reported by the lab kept as reported.
Blank: fewer than 30 isolates tested, intrinsic resistance, or not tested. n/a*: the guideline has no susceptible category for this drug (see the CSV tables for % intermediate).
